

## Lordstown Motors Reports First Quarter 2022 Financial Results

May 9, 2022

LORDSTOWN, Ohio, May 9, 2022 /PRNewswire/ -- [Lordstown Motors Corp.](#) (Nasdaq: RIDE), ("Lordstown Motors" or "LMC"), an original equipment manufacturer (OEM) of electric light duty trucks focused on the commercial fleet market, today released its first quarter 2022 financial results and provided a business update.

### First Quarter and Recent Key Business Highlights

- Ending cash balance of \$204 million; in excess of \$300 million pro forma for Foxconn transaction
- Total operating expenses of \$87.9 million 3.8% higher than 4Q21, but down 11.5%, 20.4% and 17.3% versus 3Q21, 2Q21 and 1Q21, respectively, with shifting mix in preparation for launch
- Endurance PPV test results correlating well with CAE predictions
- Continued progress preparing the Lordstown facility for commercial production launch
- Successful trade shows driving continued engagement and interest from fleets
- Continued supply chain and raw material challenges largely contained
- Received \$50 million purchase price down payments under APA in January and April
- Progress on the terms of a contract manufacturing agreement and product development agreement with Foxconn; received Committee on Foreign Investment in the United States (CFIUS) approval of the APA

### Outlook

- Reaffirming third quarter 2022 target for start of commercial production of the Endurance and initial production of approximately 500 units; commercial deliveries expected in Q4
- Balanced approach to allocate existing capital on the critical path items to get the Endurance to market
- Production ramp plan will be aligned with bill of material cost reductions and capital raising efforts

Please refer to "Forward Looking Statements" below.

### Executive Commentary

"We made significant progress toward launching the Endurance during the first quarter, notwithstanding unprecedented supply chain challenges. Our highest priority remains getting the Endurance into customers' hands so they can experience the unique attributes of the truck themselves," said Daniel Ninivaggi, CEO of Lordstown Motors. "We also continue to work closely with Foxconn to close our pending transaction and strengthen our manufacturing and product development partnership."

Edward Hightower, President of Lordstown Motors, continued, "We cannot wait for more customers to experience the Endurance, as we expect that they will love it. The performance of the Endurance in testing to date has correlated well with the performance predicted by our computer aided engineering (CAE) analyses. For example, our FMVSS frontal, side, and rear crash test results have been positive, and we are still predicting 5-star NCAP performance for the vehicle."

### First Quarter 2022 results

In the first quarter, we incurred \$87.9 million in operating expenses as we continue our progress towards the commercial launch of the Endurance. Research and development costs totaled \$61.9 million, including \$21.9 million in expenses associated with operating the Lordstown facility, \$20.2 million for engineering testing and development costs and \$19.7 million for Endurance prototype components. Compared to prior quarters, the Lordstown facility costs continue to increase as the Company hires more employees and activity rises as we prepare for launch. Engineering, testing and development expenses decreased in the first quarter versus each of the prior four quarters. Costs related to vehicle components for building PPVs and testing were flat compared to the fourth quarter, but 60% higher compared to the third quarter, primarily related to building PPVs.

SG&A was \$26.0 million in the quarter, flat versus the fourth quarter, and down 16.8% and 23.0% from the third and second quarters of 2021, respectively. The decreases were due to legal and professional fees being lower in the first quarter versus the third and second quarters offset by higher insurance and miscellaneous costs. Legal costs however, are likely to remain elevated due to ongoing litigation and the SEC investigation.

Net cash used by operations for the first quarter of 2022 totaled \$69.0 million, with our net loss of \$89.6 million offset by \$8.3 million in non-cash items and \$12.1 million in working capital benefit. Capital expenditures totaled \$21.9 million, including \$10.7 million of investments in manufacturing readiness and \$10.2 million on tooling for the Endurance. We also received the second \$50 million APA purchase price down payment from Foxconn along with \$0.5 million in proceeds from employee stock option exercises. As a result, the net decrease in cash in the quarter was \$40.6 million.

On March 31, 2022, we had cash and cash equivalents of \$203.5 million. Including the \$50 million final purchase price down payment from Foxconn received on April 15th, along with \$30 million remaining purchase price under the APA and \$27 million estimated reimbursement of certain operating and expansion costs to be received at closing, the Company's pro forma cash balance would have been over \$300 million. The APA remains subject to closing conditions and may not be consummated. Please refer to "Forward Looking Statements" below.

"Our team members are incredibly committed and continue to work tirelessly to execute on our priorities," said Adam Kroll, Chief Financial Officer of Lordstown. "We are managing through a tough macroeconomic environment, and we are focused on managing our liquidity as we bring the Endurance to launch. At the same time, we understand that raising additional capital is critical to our ability to achieve our business plan in 2022 and beyond."

**Forward Looking Statements**

This release includes forward looking statements. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These statements may be identified by words such as "feel," "believe," "expects," "estimates," "projects," "intends," "should," "is to be," or the negative of such terms, or other comparable terminology. Forward-looking statements are statements that are not historical facts. Such forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, which could cause actual results to differ materially from the forward-looking statements contained herein due to many factors, including, but not limited to: the need to raise substantial additional capital to execute our business plan, achieve our production targets for the Endurance in 2022 and beyond, to continue ongoing operations and remain a going concern, and our ability to raise such funding on a reasonable timeline and with suitable terms; the cost and other impacts of litigation, regulatory proceedings, investigations, claims and availability of insurance coverage and/or adverse publicity including with respect to the matters raised by the March 24, 2022 stockholder letter, which may have a material adverse effect, whether or not successful or valid, on our liquidity position, business prospects and ability to obtain financing; our limited operating history and our ability to execute our business plan, including through any relationship with Foxconn; our ability to raise sufficient capital in order to invest in the tooling that we expect will enable us to eventually lower the Endurance bill of materials cost, continue design enhancements of the Endurance and fund any future vehicles we may develop; the rollout of our business and the timing of expected business milestones, including our ability to complete the engineering of the Endurance, and conversion and retooling of the Lordstown facility, to establish and maintain appropriate supplier relationships, to successfully complete testing, homologation and certification, and to start production of the Endurance in accordance with our projected timeline; supply chain disruptions, inflation and the potential inability to source essential components and raw materials, including on a timely basis or at acceptable cost, and their consequences

on testing, production, sales and other activities; our ability to obtain binding purchase orders and build customer relationships; our ability to deliver on the expectations of customers with respect to the pricing, performance, quality, reliability, safety and efficiency of the Endurance and to provide the levels of service and support that they will require; our ability to conduct business using a direct sales model, rather than through a dealer network used by most other OEMs; the effects of competition on our ability to market and sell vehicles; our inability to retain key personnel and to hire additional personnel; the ability to protect our intellectual property rights; the failure to obtain required regulatory approvals; changes in laws or regulatory requirements or new or different interpretations of existing law; changes in governmental incentives and fuel and energy prices; the impact of health epidemics, including the COVID-19 pandemic, on our business; cybersecurity threats and compliance with privacy and data protection laws; failure to timely implement and maintain adequate financial, information technology and management processes and controls and procedures; and the possibility that we may be adversely affected by other economic, geopolitical, business and/or competitive factors, including the direct and indirect effects of the war in Ukraine. In addition, the transactions contemplated with Foxconn under the APA are subject to closing conditions, including further negotiation and execution of a contract manufacturing agreement and regulatory approvals, and may not be consummated. No assurances can be given that Lordstown Motors and Foxconn will enter into the agreements contemplated by the APA, including a contract manufacturing agreement or a joint venture or similar agreement to co-design and develop vehicle programs and an appropriate funding structure, or as to the terms of any such agreement. If we are unable to successfully complete the transactions contemplated by the APA and other relationships with Foxconn on a timely basis, our business plan, financial condition and results of operations would be materially and adversely impaired. If the APA does not close, we will not have sufficient available cash to repay Foxconn's down payments by the repayment deadline. As a result, Foxconn may exercise its rights under the APA, including, but not limited to foreclosing on its liens on some or substantially all of our assets, which rights will be subject to any defenses and/or other claims Lordstown Motors may have. Under such circumstances, we would be unlikely to be able to continue as a going concern. We will need additional funding to execute our 2022 business plan and achieve scaled production of the Endurance. As we seek additional sources of financing, there can be no assurance that such financing would be available to us on favorable terms or at all. Our ability to obtain additional financing in the debt and equity capital markets is subject to several factors, including market and economic conditions, the significant amount of capital required, the fact that our bill of materials cost is currently, and expected to continue to be, substantially higher than our anticipated selling price, uncertainty surrounding regulatory approval and the performance of the vehicle, meaningful exposure to material losses related to ongoing litigation and the SEC investigation, our performance and investor sentiment with respect to us and our business and industry, as well as our pending transactions with Foxconn. Additional information on potential factors that could affect the financial results of the Company and its forward-looking statements is included in its most recent Form 10-K and subsequent filings with the Securities and Exchange Commission. All forward-looking statements are qualified in their entirety by this cautionary statement. Any forward-looking statements speak only as of the date on which they are made, and Lordstown Motors undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of this release.
